Instructions for using this customizable PDF to create your own flyers or posters

1. Download this 2-page PDF to your computer. Open the PDF on your computer.

2. The second page of this PDF is customizable to your specific event needs. You can select the type you would like to change by clicking in the text box area and selecting / highlighting the text you want to change.

2. Simply type your changes replacing the copy that is in the text box. The size and color white will be automatic. We recommend all capital letters for the EVENT TITLE and upper and lower case for the rest of the areas. The greyed out area of the text box will disappear when you print.

3. When you have all the copy replaced to your event details, DO NOT SAVE THE PDF AS YOU WOULD NORMALLY DO. Instead go to the "File" pull-down menu on the upper left and select "Export to ▶ " which will show you another pull-down menu. From that menu, select "Microsoft PowerPoint Presentation" and when the new box appears in PowerPoint, select "Save." You can now delete the first page with these instructions, and "Save" again.

4. Print to your printer as you would normally do.
